

NABILA PUTRI AZHARI

+6285136733239 | nabilaazhari@student.telkomuniversisty.ac.id | www.linkedin.com/in/nabila-putri-azhari/ | github.com/nabila-azhari

Computer Science student with a strong interest in Artificial Intelligence, Machine Learning, and Data Science. Experienced in developing AI solutions, particularly in computer vision, machine learning modeling, and data-driven applications through research projects and competitions. Skilled in data preprocessing, model experimentation, and analytical problem-solving. Actively involved in academic research and technology initiatives, with a strong commitment to continuous learning and applying emerging technologies to solve real-world problems.

EDUCATION

Telkom University - Bandung

Jul 2023 - Present

Bachelor of Informatics | Bank Indonesia Scholarship Awardee

- **GPA:** 3.81 /4.00
- **Relevant Coursework:** Artificial Intelligence: A, Data Structure: A, Basic Algorithm: A
- Coursework focused on Machine Learning, Problem Solving, and Algorithm Design

WORK EXPERIENCE

Badan Meteorologi Klimatologi Geofisika - Bandung

Jul – Sep 2026

IT Intern – AI Engineer

- Developed an AI-based predictive maintenance system to estimate replacement eligibility for seismic station equipment.
- Designed and developed a centralized data warehouse integrating maintenance, inventory, and inspection data to support predictive maintenance analytics.
- Developed a mobile application for field technicians to submit inspection and maintenance reports, supporting real-time data synchronization and centralized asset monitoring.

Artificial Intelligence Lab Telkom University - Bandung

Aug 2025 – Jun 2026

Laboratory Assistant

- Contributed to faculty research on computer vision, including the development of the PACT (Pose-Anchored Compliance Tracker) framework for equipment detection and compliance monitoring, as well as deepfake detection for surveillance systems.
- Presented Computer Vision concepts and the laboratory's research as a speaker during laboratory visit sessions.
- Managed the laboratory's publication and media activities while coordinating communication more than 40 study group members.

Informatics Lab Telkom University - Bandung

Sep 2025 – Jan 2026

Practicum Assistant – Data Structure and Algorithm

- Conducted weekly practicum sessions for more than 45 students, covering fundamental and advanced programming concepts in C++ and Python.
- Mentored students through code reviews, debugging sessions, and one-on-one consultations to strengthen problem-solving and programming skills.
- Evaluated assignments and programming exercises, providing constructive feedback to support students' academic progress.

ORGANIZATION

Generasi Baru Indonesia (GenBI) - Telkom University

May 2026

Staff of Internal Affairs – Community of Bank Indonesia Scholarship Awardee

- Coordinated internal programs and member engagement activities to support the organization's operations.
- Represented GenBI Telkom University in various Bank Indonesia programs, seminars, and institutional engagement activities.

Central Computer Improvement - Telkom University

Aug 2025

Member of Data Preprocessing Division: Machine Learning, Computer Vision, Natural Language Processing

- Achieved 3rd Place in the CCI Hacks competition by developing an AI-powered industrial safety solution for helmet tracking and worker compliance monitoring.
- Collaborated with multidisciplinary teams to support AI research and development by delivering reliable datasets for model training and experimentation.

PROJECTS

Research Team, VLM-CXR 2026 – Telkom University

Jun 2026

AI Engineer – Visual Language Model, RAG & AI Agent

- Developed an Indonesian chest X-ray Visual Question Answering (VQA) system using Vision Language Models.
- Fine-tuned Vision Language Models and evaluated performance using standard VQA metrics.
- Developed a Retrieval-Augmented Generation (RAG)-based AI Agent to provide domain-specific medical knowledge for an Indonesian

Research Team, Telemedicine Bio-Informatics – Kedokteran Nuklir Universitas Padjajaran x Telkom University

Jun- Aug 2025

Data Analyst - Medical Engineering

- Processed and validated research data, ensuring data quality, consistency, and readiness for statistical analysis.
- Developed and applied Bland–Altman statistical analysis to evaluate agreement between measurement methods and support research validation.
- Coordinated research documentation, administrative processes, and communication to support collaboration across the multidisciplinary research team.

Research Team, PACT (Pose-Anchored Compliance Tracker) – Telkom University

Jun 2026

First Author, AI Engineer – Computer Vision & Deep Learning

Accepted Paper at ICERA 2026 – 5th International Conference on Electronics Representation and Algorithm

- Developed a computer vision-based PPE compliance monitoring system to automatically detect safety equipment usage and evaluate worker compliance in industrial environments.
- Integrated multi-stage detection approaches to identify safety violations, including missing PPE usage and non-compliance conditions.
- Evaluated system performance using detection metrics and compliance accuracy across multiple datasets.

Project Team, Weather Prediction Using LightGBM Machine Learning – Telkom University

Jun 2025

AI Engineer – 3rd Best Final Project AI Laboratory

- Built a weather prediction model using LightGBM and benchmarked it against multiple machine learning algorithms.
- Integrated external weather APIs for automated data retrieval and deployed the prediction model into a web application.
- Performed data preprocessing, feature engineering, and hyperparameter tuning to improve prediction performance.

Project Team, Platform Based Application

Jan 2026

Software Engineer – Recommendation System Developer & Front End Developer

- Developed a personalized event recommendation system using user profile features and similarity-based matching to recommend relevant volunteer opportunities.
- Designed and implemented responsive user interfaces while integrating event discovery, filtering, and user interaction features with the development team.
- Implemented responsive and efficient interfaces while collaborating with the team to integrate features such as event discovery, filtering, and user interaction

SKILL & CERTIFICATIONS

- **Technical Skills:** Python, C++, Go-Lang, CSS, Git, Java, React, MySQL
- **Photo & Video Editing:** Canva, Figma, Adobe Photoshop, Adobe Premiere Pro, CapCut
- **Certification:**
 - **Microsoft Certified:** Azure AI Fundamentals (AI-900) – Microsoft
 - **Python Coding Certification** – Skilvul
 - **English Proficiency Test (EPrT):** Intermediate [Score: 487/66]
 - **English Competency Certification Test (ECCT):** AB [Score: 3/4]

PUBLICATIONS

- *First Author ; Proceedings of ICERA 2026- 5th International Conference on Electronics Representation and Algorithm*
 - *PACT: Compliance Reporting in PPE Detection Based on Pose-Anchored Body Region Assignment*

ACHIEVEMENT

- **Bank Indonesia Scholarship Awardee** (2026–2027)
- **Top 20**, Machine Learning Data Competition 2026 – Institut Teknologi Bandung (ITB)
- **Semi-Finalist**, Satria Data Big Data Challenge 2025 – Ministry of Education Culture, Research, and Technology (Kemendikbudristek)
- **1st Place**, Artificial Intelligence Innovation Paper Competition 2025 – IAIN Kerinci
- **1st Place**, Artificial Intelligence Essay Competition 2025 – Koperasi Mahasiswa Purwokerto
- **3rd Place**, Machine Learning Kaggle Data Research Competition – Telkom University
- **Finalist**, ADIKARA Innovation Division, PRODIGI – Telkom University
- **Finalist**, International Business Plan Competition 2024 – Universitas Udayana
- **1st Place**, Open Library Book Review Challenge – Telkom University
